

Samuel Kofi Agyei-Tuffour

IT Security & Identity Engineer · Entra ID · Microsoft 365

Rotterdam, Netherlands · kofileumas@gmail.com · linkedin.com/in/s-k-agyei-tuffour

Open to IT security and identity / IAM roles in the Netherlands

PROFILE

IT security and identity engineer. I came into this after a bank my father's firm guarded was hit through a compromised identity. Telecom diploma, then computer science (identity and access control), then a cybersecurity master's on IAM and GRC. SevenX was part-time while I was still in school. After a year in the Hunt&Hackett SOC I moved to SysOps, where I own the IT security of Entra ID, Azure, Intune, SharePoint, Atlassian, and 1Password — access reviews, break-glass, joiner / mover / leaver. SC-100 (2026), AZ-500 (2025).

EXPERIENCE

SysOps Engineer — Hunt&Hackett

The Hague, NL · Jan 2025 – Present

- One of two on SysOps. Own the IT security of Entra ID, Azure, Intune, SharePoint, Atlassian, and 1Password — including break-glass and access reviews.
- Enterprise Zero Trust with Conditional Access, PIM, and Entra ID Governance.
- IAM automation platform (Django, Graph API) that cut access-review effort by 25%.
- Passwordless (YubiKey) and Intune-managed workspaces; 15% lower identity risk metrics.

SOC Engineer — Hunt&Hackett

The Hague, NL · Jan 2024 – Dec 2024

- Microsoft 365 and Azure incidents: identity misuse, bad access, how people actually got into the tenant.
- Tuned detections so identity misuse was visible — 12% better detection efficiency, 20% fewer false positives.

IT Security Engineer — SevenX

Kigali, Rwanda · Feb 2021 – Aug 2023 · part-time / internship

- Part-time while studying. Access control, identity provisioning, and policy work.
- Internal security audits and remediation; security-awareness training for 30+ colleagues.

SELECTED WORK

- **Access Register** — Who can open which Entra app, including group-granted access, plus leftover M365 accounts.
- **grupID** — JML platform for employee account lifecycle and access; 25% less manual IAM effort.
- **ExitScan** — Leaver offboarding and orphaned-account detection across downstream apps.
- **AuditVault** — ISO 27001 evidence packs from identity logs.

SKILLS

Identity: Entra ID, PIM, Conditional Access, FIDO2, JML, access reviews, IAM / IGA.

IT security: Microsoft 365, Intune, SharePoint permissions, Atlassian, 1Password, break-glass.

Automation: Python, Django, Microsoft Graph API, Logic Apps.

Audits: ISO 27001, SOC 2, evidence from identity logs.

EDUCATION & CERTIFICATIONS

- MSc Cybersecurity — National Forensic Sciences University, India (scholarship; IAM and GRC)
- BSc (Hons) Computer Science — PDM University, India (identity and access control)
- Diploma, Telecommunication Engineering — GCTU, Ghana
- Systemic Design — Digital Society School, Netherlands
- Microsoft Certified: Cybersecurity Architect Expert (SC-100), 2026
- Microsoft Certified: Azure Security Engineer Associate (AZ-500), 2025
