

Samuel Kofi Agyei-Tuffour

IT Security & Identity Engineer · Entra ID · IAM

Rotterdam, Netherlands · kofileumas@gmail.com · linkedin.com/in/s-k-agyei-tuffour

Open to IT security and identity / IAM roles in the Netherlands and the UK

PROFILE

IT security and identity engineer. I came into this after a bank my father's firm guarded was hit through a compromised identity. Telecom diploma, then computer science (identity and access control), then a cybersecurity master's on IAM and GRC. SevenX was part-time while I was still in school. At Hunt&Hackett I started in the SOC, then split the week (three days SysOps, two days SOC) and moved fully to SysOps, where I own the IT security of Entra ID, Azure, Intune, SharePoint, Atlassian, and 1Password — access reviews, joiner / mover / leaver. SC-100 (2026), AZ-500 (2025).

EXPERIENCE

SysOps Engineer — Hunt&Hackett

The Hague, NL · Jun 2024 – Present · split week with SOC until Mar 2025

- One of two on SysOps. Own the IT security of Entra ID, Azure, Intune, SharePoint, Atlassian, and 1Password — including access reviews.
- Conditional Access, PIM, and Entra ID Governance so least privilege is the default, not a cleanup project.
- IAM automation platform (Django, Graph API) that cut access-review effort by 25%.
- Passwordless (YubiKey) and Intune-managed workspaces; 15% lower identity risk metrics.

SOC Engineer — Hunt&Hackett

The Hague, NL · Jan 2024 – Mar 2025 · 2 days/week from Jun 2024

- Microsoft 365 and Azure incidents: identity misuse, bad access, how people actually got into the tenant.
- Tuned detections so identity misuse was visible — 12% better detection efficiency, 20% fewer false positives.

IT Security Analyst — SevenX

Kigali, Rwanda · Feb 2021 – Aug 2023 · part-time / internship

- Day-to-day IT security: access control, identity provisioning, and who could use which systems.
- Internal security audits, then stayed with the findings until they were fixed.
- Access policy and training for 30+ colleagues; compliance went up after that.

SELECTED WORK

- **Access Register** — Who can open which Entra app, including group-granted access, plus leftover M365 accounts.
- **gruprID** — JML platform for employee account lifecycle and access; 25% less manual IAM effort.
- **ExitScan** — Leaver offboarding and orphaned-account detection across downstream apps.
- **AuditVault** — ISO 27001 evidence packs from identity logs.

SKILLS

Identity: Entra ID, PIM, Conditional Access, FIDO2, JML, access reviews, IAM / IGA.

IT security: Microsoft 365, Intune, SharePoint permissions, Atlassian, 1Password.

Automation: Python, Django, Microsoft Graph API, Logic Apps.

Audits: ISO 27001, SOC 2, evidence from identity logs.

EDUCATION & CERTIFICATIONS

- MSc Cybersecurity — National Forensic Sciences University, India (scholarship; IAM and GRC)
- BSc (Hons) Computer Science — PDM University, India (identity and access control)
- Diploma, Telecommunication Engineering — GCTU, Ghana
- Systemic Design — Digital Society School, Netherlands
- Microsoft Certified: Cybersecurity Architect Expert (SC-100), 2026
- Microsoft Certified: Azure Security Engineer Associate (AZ-500), 2025
